

To Whom It May Concern:

When Energy Efficiency Resources (EER) approached us about a rebate program initially we were incredibly skeptical as unfortunately our experience with Utility programs have seemed to always fail us for a number of different reasons....

That said something they said eased my fears (A Little) it was in reference to the Consumers Energy Business Instant Discount Program and they explained how they filled out all of the paperwork! All I needed to do was provide them a job name, address, and list of cog belts needed and from there they would handle everything! Best part and only reason I tried it was if there was an issue with the rebate program that was something they had to deal with and not me!

We're now going into our 4th month of orders and not one issue! Belts delivered on time and we don't have to worry about the rebates or paperwork just as they promised!

Working with them and our Account Manager Kevin has been amazing!
