Six Sigma Black Belt
SWOT Analysis Specialist

PROFESSIONAL OVERVIEW

International business transformation and SAP/ERP professional with 29 years of experience, combining executive leadership, entrepreneurship, operational expertise and hands-on project delivery.

My strength lies in understanding how businesses really operate, identifying improvement opportunities and translating them into practical, sustainable solutions. From boardroom discussions to shop-floor operations and technical implementation, I bridge organizational levels, business functions and technology.

Experienced across pharmaceuticals, chemicals, manufacturing, logistics and professional services, with a strong focus on operational excellence, change management and measurable business improvement.

SELECTED WORK EXPERIENCE

2025–2026 | Galderma — BI & Data Integration Expert

Strengthened BI and data integration governance by clarifying team responsibilities, improving ways of working and aligning business requirements, data and technology.

2025–2026 | CNT — Project Manager / Test Coordinator

Led stakeholder workshops, coordinated cross-functional teams and established structured testing, issue management and project reporting practices.

2023 | Resity Technologies — Director International Business & SAP Team Lead

Strengthened the Serbian consulting organization through resource management, team development, internal governance, training structures and strategic partnerships.

2022–2023 | KRKA — SAP S/4HANA Solution Architect

Guided supply chain solution architecture and business process alignment for a greenfield SAP S/4HANA transformation, facilitating fit-to-standard workshops.

2019–2023 | Recipharm — Business Analyst Liaison

Drove SAP and business process alignment, master data improvements and cross-functional optimization initiatives, coordinating international consulting resources.

2018–2019 | AMRI — ERP Effectiveness Consultant / Project Manager

Conducted a 360° operational assessment and subsequently led an SAP optimization program covering business processes, master data governance, change management and training.
