**For People of Age
18 Years and above**

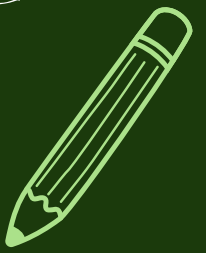

Ready to turn your free time into financial freedom?

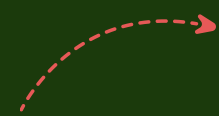

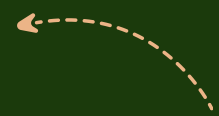

Looking for a fresh start after a career gap?

Want to earn while managing your home and family?

Interested in empowering children while growing your income?

Looking for a smart career move that doesn't require a big investment?

$$1 + n(2a + (n-1)b)$$

$$x_2' = \frac{-b \pm \sqrt{b^2 - 4ac}}{2}$$

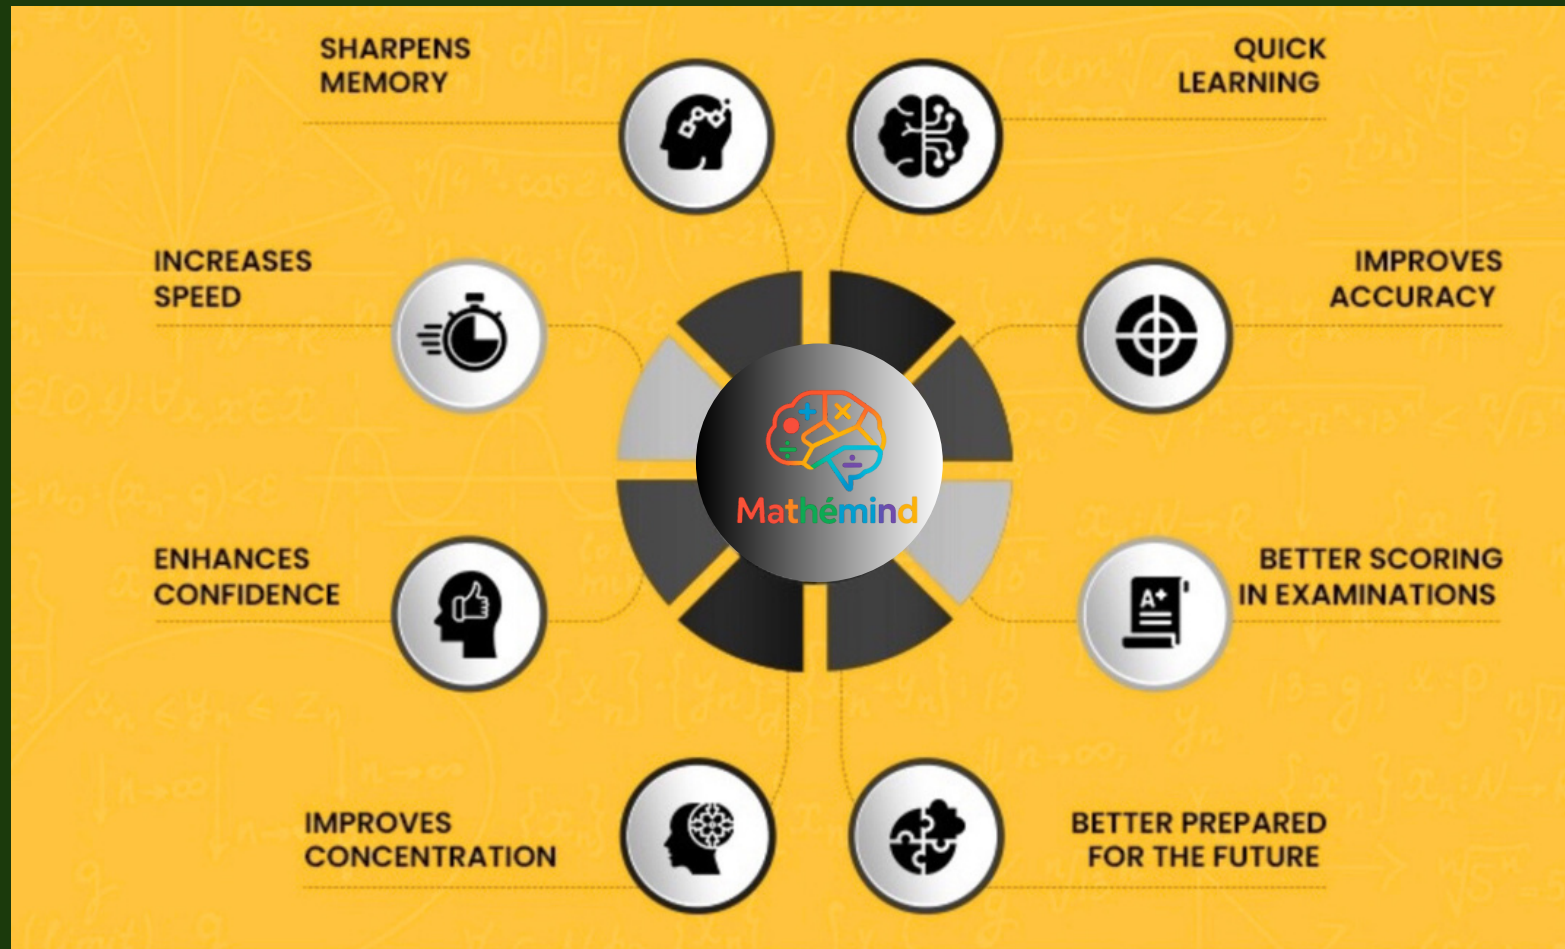

Be a part of
MATHEMIND

and Transform your
Teaching Skills with our Vedic Maths and
Abacus Teacher Training Programme

REVEALING
THE SECRETS OF
MATHEMATICS

Vedic Maths & Abacus build a strong math foundation while making learning fun and engaging.

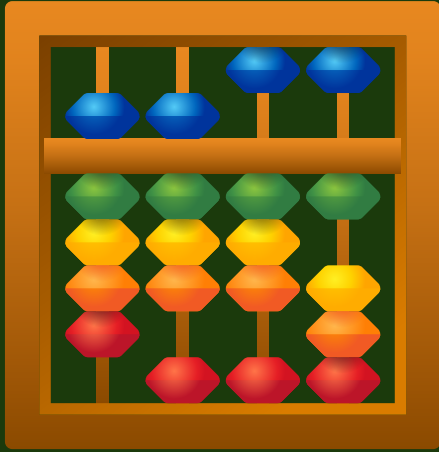

VEDIC MATHS COURSE CURRICULUM

- Addition & Subtraction
- Multiplication & Division
- Japanese Multiplication
- Squares & Cubes
- Square root & Cube Root
- Algebra & Equations
- HCF & LCM
- Factorization
- Fractions
- Geometry
- Divisibility Rules & Calender

Duration- 3 Months

ABACUS COURSE CURRICULUM

Duration- 3 Months

- Addition & Subtraction
- Multiplication
- Division
- Decimals
- Square root & Cube Root
- Percentage
- LCM & HCF

Thinking Exercises

Use number patterns, mental calculations, and visual techniques to build critical thinking and fast problem-solving skills.

Mind Mapping

Break down complex maths topics into simple, visual patterns – just like Vedic Maths formulas or Abacus number placement.

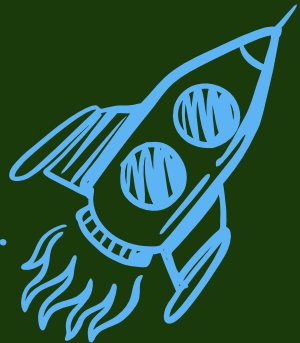

Explaining with real-life examples

Relate modern maths problems to ancient Vedic tricks or Abacus bead movements to simplify learning and deepen understanding.

Learning Together

Group Abacus activities and Vedic puzzles help students work together, talk clearly, and understand concepts better.

Experiment and Learn

Encourage learners to try new techniques, practice repeatedly, and improve through feedback—just like perfecting a new method.

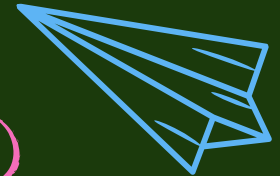

Out-of-the-Box Thinking

Use flashcards, number games, or brain teasers to activate creative math thinking and quick responses.

Switching Perspectives

Let students teach back Abacus steps or Vedic tricks to peers – boosts confidence, memory and clarity.

Think differently

Teach students to move beyond conventional methods – multiplication without tables, division without long steps!

SKILL DEVELOPMENT WITH VEDIC MATHS & ABACUS

Who Can Join the Vedic Maths & Abacus Programme?

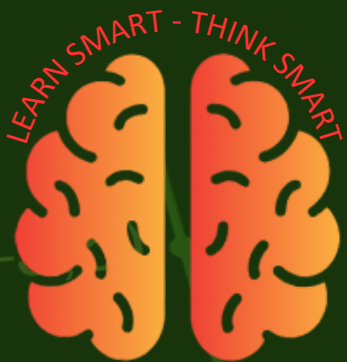

- Housewives
- Teachers
- Tutors
- Coaching center owners
- College Students
- Working Professionals
- Retired People
- Anyone looking to start a teaching career or side income
