WE CAN HELP!

Outreach can help patients who are looking to immediately subside Opioid or Heroin use, end prescription pain medication use, and patients who may benefit from the pain-relieving symptoms of Suboxone. We have experience assisting individuals who may be chronic relapse patients or patients coming out of an intensive drug treatment program and are looking for a barrier. We gladly offer flexibility for treatment times and locations.

ABOUT US

Outreach offers addiction and mental health outpatient clinics across Florida, Maryland, New Jersey, Pennsylvania, and Virginia. We offer substance abuse treatment with experienced behavioral health providers for ongoing recovery treatment. We treat patients in an outpatient setting so they can continue a normal routine without the dependency on harmful drugs. Patients can respond very quickly with positive results and low risk. Most patients are able to begin a healthy life starting within their first visit.

PSYCHIATRIC MEDICATION MANAGEMENT

Our physicians can provide a comprehensive psychiatric evaluation that can grant a pathway forward to develop an extensive treatment plan. A mental evaluation is an assessment intended to analyze emotional, social, or formative conditions to render a diagnosis for treatment. Every physician has his or her own framework and a definitive determination may not be made in the principal visit. After the initial evaluation, a diagnosis will be made and a treatment plan is developed. Our provider will manage the side effects, effectiveness, and patient compliance when introducing a new medication for treatment.

ADDICTIONS WE TREAT

We treat various drug addictions including heroin, opioid, prescription painkillers, alcohol, cocaine, THC, methamphetamine, benzodiazepines, MDMA, and more.

MEDICATIONS WE USE

Suboxone
Zubsolv
Vivitrol
Naltrexone
Sublocade
Probuphine
Lucemyra
