COMPANY PROFILE

COMPANY SNAPSHOT

Who We Are?

Altitude Group is a Fiji-based engineering solutions group delivering HVAC, refrigeration, commercial kitchen, and fabrication services across Fiji and the Pacific.

We support hotels, resorts, commercial facilities, government projects, supermarkets, restaurants, healthcare facilities, and industrial clients with practical, reliable, and technically sound solutions.

What We Do?

We provide complete support across the project lifecycle:

Design | Supply | Installation | Commissioning | Maintenance | After-Sales Support

Our Core Divisions

Cold rooms, freezer rooms, display refrigeration, ice machines and refrigeration maintenance

Air-conditioning, ventilation, ducting, VRF/VRV, chilled water systems and servicing

Stainless steel fabrication, ducting, exhaust hoods, cladding, pipe covers and custom metal works

Commercial kitchen design, equipment supply, installation, commissioning and after-sales support

ABOUT US

Altitude Group is a Fiji-based engineering solutions group delivering HVAC, refrigeration, commercial kitchen and fabrication services across Fiji and the Pacific.

We support hotels, resorts, commercial facilities, government projects, supermarkets, restaurants, healthcare facilities and industrial clients.

Our Mission

To exceed customer expectations through reliable service, quality products and practical technical solutions.

Our Vision

To be a leading provider of high-quality, cost-effective and innovative HVAC, refrigeration, commercial kitchen and fabrication solutions across Fiji and the Pacific.

Our Quality Commitment

We are committed to consistent, reliable and high-quality work across planning, supply, installation, commissioning and after-sales support.

LEADERSHIP & OPERATING MODEL

Altitude Group is led by a senior leadership team responsible for strategy, technical delivery, operations, finance, people, customer experience and compliance.

Each department has a clear role, while working together to deliver projects safely, efficiently and with long-term client support.

Director-Led Technical & Commercial Oversight

Robbie Hunt

Technical Director

Ryan Hunt

Managing Director

Altitude Group is led by Robbie Hunt and Ryan Hunt, combining strong technical direction with practical commercial leadership. Together, they guide the company's project delivery, service standards, supplier relationships and long-term growth across HVAC, refrigeration, commercial kitchen and fabrication solutions.

Under their leadership, Altitude focuses on reliable delivery, clear communication, technical quality and long-term client support.

FINANCE & ADMIN

SENIOR LEADERS

Lizette Hunt
Finance Manager

Yogesh Prasad
Management Accountant

Ana Tawawa
Executive Assistant

Merilyn Narayan
HOD Accounts

The Finance & Admin team supports Altitude Group with financial control, reporting, administration and business coordination across all divisions.

The department provides accurate financial information, budgeting support, cash flow monitoring, cost control and project reporting. This helps leadership and operational teams make faster, clearer and more informed decisions.

Through strong administration, documentation and financial oversight, the team helps keep projects organised, suppliers managed, records maintained and departments aligned with business goals.

Department Focus

- **Financial Reporting**

Accurate accounts, budgeting, cash flow tracking and cost control.

- **Management Accounting**

Turning financial data into clear insights for better business decisions.

- **Administration & Documentation**

Maintaining records, coordination, compliance support and internal communication.

- **Commercial Support**

Supporting procurement, supplier coordination and project administration.

- **Business Control**

Helping departments plan, track performance and manage resources effectively.

ENGINEERING

SENIOR LEADERS

Rodrigo Borres
HOD Engineering

Jitendra Deo
Projects Supervisor

Nishmal Kumar
Technical Support Specialist

Altitude's engineering leadership team supports the technical delivery of HVAC, refrigeration, fabrication and mechanical services across Fiji.

The team brings together design review, site coordination, installation supervision, testing, commissioning, troubleshooting and maintenance support. Their role is to ensure each project is delivered with practical technical input, quality workmanship and reliable after-sales support.

With in-house capability across engineering, duct fabrication, installation and service, the team helps Altitude deliver solutions that are efficient, compliant and built for Fiji conditions.

Department Focus

- **Design & Engineering**

Technical review, layout support, system optimisation and project planning.

- **Installation & Site Delivery**

Coordinating manpower, site works, installation quality and project execution.

- **Testing & Commissioning**

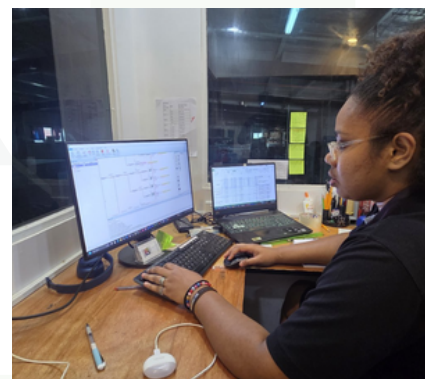

System checks, performance verification and handover support.

- **Service & Troubleshooting**

Preventative maintenance, fault finding, repairs and after-sales support.

- **Fabrication Support**

In-house ducting, stainless steel works and custom fabrication coordination.

SERVICE & OPERATIONS

SENIOR LEADERS

Shamma Nisha

HOD Operations

Ravinesh Prasad

Service Supervisor

Altitude Group's Service & Operations team supports the daily coordination, scheduling and delivery of works across HVAC, refrigeration, commercial kitchen and maintenance services.

The team manages client requests, technician planning, job coordination, warehouse support, site attendance, breakdown response and after-sales follow-up. Their role is to keep work moving smoothly from enquiry through to completion.

With service teams, coordination staff, technicians, vehicles and outer island support capability, this department helps Altitude respond to client needs quickly, clearly and reliably.

Department Focus

- **Service Coordination**

Managing client requests, technician planning and job scheduling.

- **Operations Support**

Coordinating manpower, materials, stock movement and site requirements.

- **Breakdown Response**

Supporting urgent callouts, fault finding and repair coordination.

- **Preventative Maintenance**

Planning routine servicing to keep systems operating reliably.

- **Client Communication**

Keeping clients updated from enquiry, site visit, quotation, repair and completion.

SALES & MARKETING

SENIOR LEADERS

Emosi Delana
HOD Sales & Business Development

Dennish Chand
HOD Branding & Customer Experience

Altitude Group's Sales & Marketing leadership team supports business growth through client engagement, sales development, brand visibility and customer experience.

The team works across enquiries, proposals, client communication, campaigns, customer follow-up and market positioning. Their role is to connect Altitude's technical capability with the right clients, sectors and opportunities.

Together, Sales and Marketing help strengthen relationships, improve customer satisfaction and position Altitude Group as a trusted solutions provider across Fiji and the Pacific.

Department Focus

- **Sales Development**

Client engagement, account management, enquiries and opportunity follow-up.

- **Proposals & Communication**

Clear client communication, company profiles, proposals and presentation support.

- **Brand & Marketing**

Campaigns, digital platforms, content, visibility and market positioning.

- **Customer Experience**

Customer follow-up, satisfaction, feedback and relationship building.

- **Market Growth**

Supporting new opportunities across tourism, commercial, government and industrial sectors.

PEOPLE & CULTURE

SENIOR LEADER

Harry Fong
Acting HOD People & Culture

Altitude Group's People & Culture function supports workforce planning, recruitment, onboarding, training, OHS, compliance and employee engagement across all divisions.

The department helps ensure Altitude has the right people, skills, safety practices and workplace systems needed to support daily operations, project delivery and long-term business growth.

With a focus on clarity, accountability and continuous improvement, People & Culture plays a key role in building a skilled, safe and well-supported workforce.

Department Focus

- **Workforce Planning**

Recruitment, onboarding, staff planning and employee support.

- **Training & Development**

Apprenticeship coordination, staff upskilling and capability building.

- **OHS & Compliance**

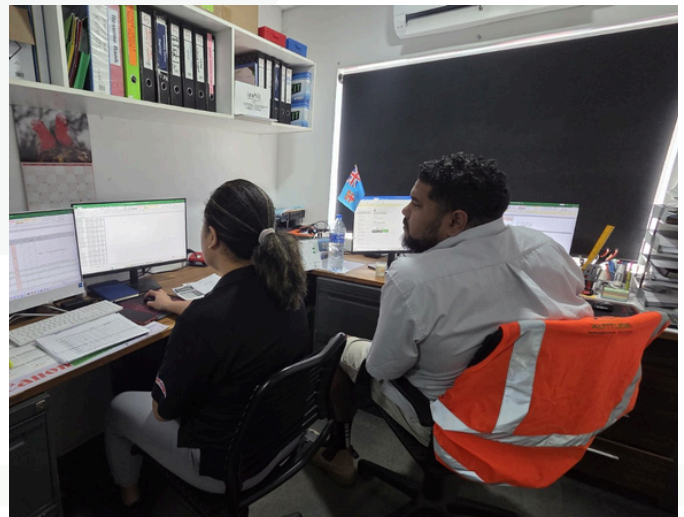

Safety systems, workplace risk management and regulatory compliance.

- **People Management**

Performance support, employee relations, engagement and workplace culture.

- **Payroll & Administration**

Attendance, payroll support, staff records, PPE and HR documentation.

INVENTORY

SENIOR LEADER

Aisake Kirailevu

Warehouse & Inventory Controller

Altitude Group's Warehouse & Inventory function supports the accurate, efficient and safe movement of materials, equipment and stock across all divisions.

With warehouse support across Nadi, Suva and Lomolomo, the department manages receiving, storage, stock tracking, dispatch and delivery coordination for projects, service jobs and client requirements. Our warehouses support a wide range of operational items including HVAC equipment, refrigeration components, commercial kitchen equipment, ducting materials, stainless steel items, spare parts, tools, consumables, PPE and project materials.

Department Focus

- **Inventory Management**

Stock tracking, cycle counts, inventory control and discrepancy reduction.

- **Warehouse Operations**

Receiving, storage, dispatch and safe handling of materials and equipment.

- **Stock Holding**

HVAC units, refrigeration parts, kitchen equipment, ducting materials, stainless steel items, tools and consumables.

- **Multi-Location Support**

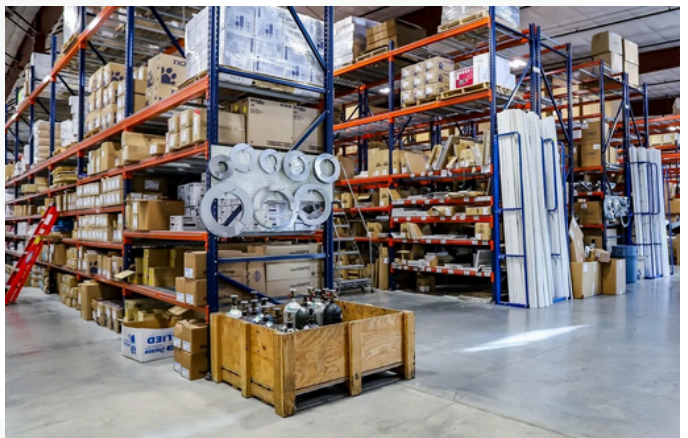

Supporting stock movement across Nadi, Suva and Lomolomo.

- **Deliveries & Dispatch**

Preparing and coordinating items for project, service and client delivery.

- **Operational Support**

Helping reduce delays and support reliable project delivery.

ALTITUDE

HVAC SOLUTIONS

AC, ventilation and ducting solutions for Fiji's commercial, hospitality & industrial sectors.

HVAC Design & Build

System design, layout planning and equipment selection.

Air Conditioning Systems

Commercial & residential cooling , VRF/VRV, chilled water

Ventilation Solutions

Fresh air, exhaust air and indoor air movement systems.

Ducting Fabrication

Rectangular, spiral round, oval and P3 board ducting support.

Testing & Commissioning

System testing, balancing, performance checks and handover support.

Service & Maintenance

Preventative maintenance, repairs, troubleshooting and after-sales support.

ALTITUDE HVAC AT A GLANCE

Engineering Comfort. Powering Progress.

Altitude HVAC Solutions delivers advanced air-conditioning, ventilation, chilled water, ducting and building control systems across Fiji and the Pacific.

With support from experienced engineers, trained technicians, in-house duct fabrication, strong supplier partnerships and service capability, the division supports projects from design through to commissioning and long-term maintenance.

Why Clients Choose Altitude HVAC

- Design, supply, installation and commissioning under one team
- HVAC systems tailored to Fiji's climate and site conditions
- In-house duct and sheet metal support
- Strong hospitality, healthcare and commercial project experience
- After-sales service and preventative maintenance capability
- Trusted supplier and brand partnerships

ENGINEERING, DESIGN & PROJECT DELIVERY

Designed for Performance. Built for Fiji Conditions.

Altitude HVAC Solutions supports projects from early design through to installation and handover.

The division works with consultants, builders, project managers and end users to deliver practical HVAC solutions based on building use, performance requirements, energy efficiency and long-term serviceability.

Core Capability

- **Load Calculations**

Correct system sizing for comfort, efficiency and system reliability.

- **System Layout Planning**

Layouts developed around space planning, airflow performance and coordination.

- **Equipment Selection**

System selection based on project needs, efficiency and maintenance practicality.

- **CAD & Revit Drawings**

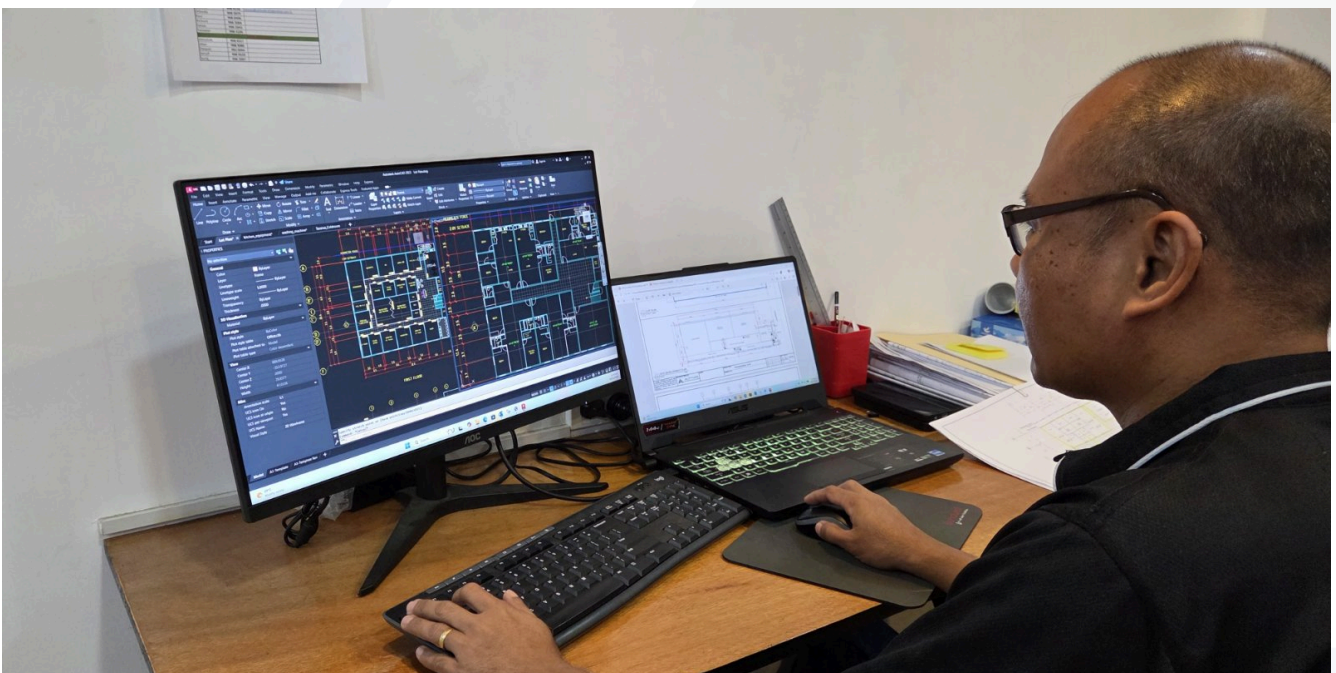

2D and 3D drafting for technical coordination and project visualization.

- **Project Documentation**

Commissioning reports, as-built drawings, operation manuals and maintenance plans.

- **Why This Matters**

This allows Altitude HVAC to support projects with better technical clarity, better coordination and stronger project outcomes

AC, VENTILATION & CONTROLS

Complete HVAC System Capability

Altitude HVAC Solutions supports a wide range of air-conditioning, ventilation and building control systems for residential, commercial, hospitality and industrial projects.

Air-Conditioning Systems

- Split systems
- Multi-split systems
- VRF / VRV systems
- Chilled water systems
- Air handling units (AHU)
- Fan coil units (FCU)
- Air-cooled condensing units

Ventilation Systems

- Fresh air systems
- Exhaust air systems
- Commercial kitchen exhaust systems
- Heat recovery ventilators
- Energy recovery ventilators
- Air filtration and purification systems
- Grilles, diffusers, fire dampers and smoke dampers

Controls & Automation

- Building Management Systems (BMS)
- Smart controls and monitoring
- HVAC automation integration
- Electrical control support

Brand Support

We can get access to virtually any brand in the industry that you desire... all we need is your request.

Below is a non-exhaustive list of several key suppliers and brands

1st in Fiji with spiral and
round ducting capability

SPIRAL & ROUND DUCTING

First in Fiji. Built for Better Airflow.

Altitude HVAC Solutions supports commercial, hospitality and industrial projects with in-house spiral and round ducting capability.

Manufactured using advanced duct-making machinery, our round ducting supports efficient airflow, cleaner installation finishes and better coordination for modern HVAC projects.

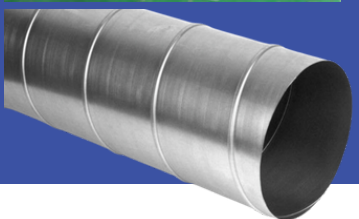

This capability gives Altitude greater control over quality, lead time and site delivery — from design and fabrication through to installation and commissioning.

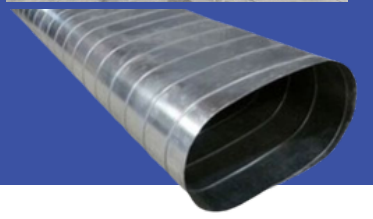

Highlights of Our Equipment:

- Spiral Duct Machine for round duct production
- PLC-Guided Cutting System for consistent manufacturing
- Oval Duct Machine for space-saving duct conversion
- Lobster Bend Machine for round duct bends
- Pressed Bend & Connector Support for ductwork installation

CHILLED WATER & GLYCOL COOLING SYSTEMS

Advanced cooling solutions for high-demand facilities.

Altitude HVAC Solutions supports the design, supply, installation, commissioning and maintenance of chilled water and glycol cooling systems for commercial, hospitality, healthcare and industrial applications.

These systems are suited for facilities that require reliable, large-scale cooling performance, stable temperature control and long-term operational efficiency.

Our experience includes chilled water system works for Aspen Ba Hospital and glycol cooling system works for Westin Resort, Denarau, demonstrating capability across both critical facility cooling and large resort environments.

Capability Areas

- **Chilled Water Systems**

Centralised cooling for hotels, hospitals, commercial buildings and large facilities.

- **Water Chillers**

Cooling plant solutions for high-demand HVAC applications.

- **Glycol Cooling Systems**

Specialised cooling for process and resort applications requiring stable temperature control.

- **Pumps & Pipework**

System distribution support for chilled water and glycol circulation.

- **AHU / FCU Integration**

Connecting central cooling systems to air handling and fan coil units.

- **Controls & Monitoring**

BMS and control integration for performance monitoring and system efficiency.

- **Maintenance Support**

Servicing, troubleshooting and system optimisation for long-term reliability.

BUILDING MANAGEMENT SYSTEMS (BMS)

Smart control and system integration for modern facilities.

Altitude HVAC Solutions provides Building Management System (BMS) design, integration, installation and support for commercial, hospitality, healthcare and industrial projects. Our team includes a certified BMS engineer, a certified BMS technician, and qualified expatriate technical support, giving clients added confidence in the delivery of specialised automation and control systems.

We support centralised monitoring and control of HVAC, ventilation and other building services, helping clients improve system visibility, operating efficiency and long-term performance.

Capability Areas

- **BMS Design & Integration**

System design, control logic and integration planning.

- **Centralised Monitoring**

Improved visibility across HVAC and ventilation systems.

- **System Coordination**

Integration with lighting, power, fire and security systems in coordination with trusted contractors.

- **Installation & Commissioning**

Panel setup, system testing and handover support.

- **Ongoing Support**

Monitoring, maintenance and troubleshooting for long-term reliability.

Altitude HVAC Solutions is supported by a certified BMS Engineer and BMS Technician, providing specialist capability in building automation, controls integration, commissioning and ongoing support.

ELECTRICAL CONTROL PANELS & MSSB'S

Control solutions for reliable HVAC operation.

Altitude HVAC Solutions supports the design, installation and commissioning of electrical control panels and MSSB's for commercial air-conditioning and mechanical systems.

Our control panel works support safe, efficient and reliable operation of HVAC systems, including control integration, wiring diagrams, component selection and site commissioning.

We also support panel labelling using our Traffolyte laser printer, helping improve identification, maintenance and site documentation.

Capability Areas

- **Control Panel Design**

Electrical control systems for HVAC and mechanical applications.

- **Component Selection**

Switchgear, MCCBs, contactors, PLCs, overloads and VSD/VFDs.

- **CAD Wiring Diagrams**

Clear wiring layouts for installation and commissioning.

- **Installation & Commissioning**

Panel setup, system testing and reliable operation.

- **Panel Labelling**

Traffolyte labels for switchboards, plant and equipment.

ALTITUDE

REFRIGERATION SOLUTIONS

Cold storage, commercial refrigeration and temperature-control solutions for Fiji's hospitality, retail, healthcare, food service and industrial sectors.

Refrigeration Design & Build

System planning, room layout and equipment selection.

Cold & Freezer Rooms

Custom cold storage and freezer room solutions.

Commercial Refrigeration

Display refrigeration, cabinets, chillers, mortuaries and commercial cooling systems.

Ice Machines & Display Units

Ice machines, upright chillers, display freezers and food service refrigeration.

Spare Parts & Unit stocks

Condensing units, evaporators, controls and refrigeration system components.

Service & Maintenance

Preventative maintenance, repairs, troubleshooting and after-sales support

COLD & FREEZER ROOMS

Built for reliable temperature control.

Altitude Refrigeration Solutions designs, supplies, installs, commissions and maintains cold rooms and freezer rooms for commercial, hospitality, healthcare, retail and industrial clients across Fiji.

Our cold storage solutions are built around practical site requirements, product holding needs, operating temperatures, access, serviceability and long-term reliability.

From small back-of-house storage rooms to larger commercial cold storage applications, Altitude supports clients with complete refrigeration system delivery and after-sales support.

Capability Areas

- **Cold Rooms**

Temperature-controlled storage for food, beverages, produce, medical items and commercial stock.

- **Freezer Rooms**

Low-temperature storage solutions for frozen goods and high-demand operations.

- **PIR Panel Rooms**

Insulated panel rooms designed for reliable temperature holding and practical site installation.

- **Refrigeration Systems**

Condensing units, evaporators, controls, pipework and system components.

- **Doors & Accessories**

Hinged doors, sliding doors, shelving options, lighting, curtains and access requirements.

- **Service & Maintenance**

Preventative maintenance, repairs, troubleshooting and after-sales support.

HEALTH CARE COLD STORAGE

Specialist cold storage for healthcare and institutional facilities.

Altitude has supported healthcare cold storage requirements across Fiji, including mortuary refrigeration works and technical scope development for commercial & government projects.

Our experience covers cabinet mortuary units, containerised mortuary solutions, refrigeration systems, stainless steel body storage racks, digital controls, alarms, testing, commissioning and after-sales support.

For healthcare and institutional projects, reliability is critical. Our approach focuses on stable temperature control, hygienic internal finishes, practical service access and long-term maintenance support.

Altitude can also support remote and regional healthcare sites through coordinated electrical, civil and backup power planning where required.

Capability Areas

- **Mortuary Refrigeration**

Cold storage systems for healthcare and institutional use.

- **Cabinet Storage Options**

Multi-body cabinet systems for controlled mortuary storage.

- **Insulated Room Solutions**

PIR panel cold storage rooms for healthcare environments.

- **Stainless Steel Storage**

Body trays, racks and internal storage support.

- **Digital Controls & Alarms**

Temperature monitoring, alerts and system visibility.

- **Service & Maintenance**

Commissioning, preventative maintenance and breakdown support.

RETAIL & HOSPITALITY REFRIGERATION

Reliable cooling solutions for retail, food service, hospitality and industrial operations.

Altitude Refrigeration Solutions supplies, installs, commissions and maintains refrigeration systems for supermarkets, cafés, restaurants, resorts, commercial kitchens and warehouse facilities across Fiji.

Our experience covers display refrigeration, upright chillers, freezer units, commercial refrigerators, ice machines, refrigerated cabinets, remote systems and custom-built solutions for retail and food service environments.

With technical support, spare parts access and after-sales service, Altitude helps clients protect stock, reduce downtime and maintain reliable temperature control.

Capability Areas

- **Display Refrigeration**

Retail chillers, display freezers, glass-door units and merchandising refrigeration.

- **Ice Machines**

Commercial ice machines for hotels, resorts, bars, restaurants and food service operations.

- **Commercial Storage**

Upright chillers, freezers and storage refrigeration for food service and hospitality.

- **Supermarket Refrigeration**

Refrigerated cabinets, display cases, remote systems and retail cooling support.

- **Custom Solutions**

Site-specific refrigeration systems for unique layouts, operating needs and space constraints.

- **Spare Parts & Support**

Access to refrigeration components, replacement parts, servicing and maintenance.

PACIFIC KITCHENS

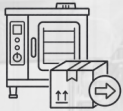

& CATERING EQUIPMENT

Commercial kitchen, catering equipment and foodservice solutions for hotels, resorts, restaurants, bakeries and production kitchens.

Commercial Kitchen Design

Custom kitchen layouts, workflow planning and HACCP-ready zones.

Equipment Supply

Ovens, fryers, dishwashers, refrigeration and food preparation equipment.

Installation & Commissioning

Equipment setup, testing, handover and operational readiness.

Stainless Steel & Exhaust Support

Benches, shelving, exhaust hoods and kitchen ventilation coordination.

Spare Parts & Technical Support

Parts support, troubleshooting and supplier coordination.

Service & Maintenance

Preventative maintenance, repairs, troubleshooting and after-sales support.

COMMERCIAL KITCHEN DESIGN & FIT-OUT

Designed around workflow, food safety and operational efficiency.

Pacific Kitchens & Catering Equipment supports commercial kitchen projects from early planning through to equipment selection, installation and handover.

Our design approach considers kitchen workflow, food safety, space utilisation, equipment access, energy efficiency, servicing requirements and future operational needs.

From hotel kitchens and resort back-of-house areas to restaurants, bakeries and production kitchens, PKCE helps clients create practical kitchen layouts that are built to perform.

Capability Areas

- **Kitchen Layout Planning**

Practical kitchen layouts based on workflow, space and operational needs.

- **CAD Drawings**

2D layout plans and equipment positioning for project coordination.

- **3D Visualisation**

3D renderings and walkthrough support for selected projects.

- **HACCP-Ready Zones**

Design support for food safety, hygiene flow and kitchen zoning.

- **Equipment Scheduling**

Clear equipment lists to support supply, pricing and installation planning.

- **Consultant Coordination**

Working with architects, MEP teams, foodservice consultants and clients.

Roberto Gallardo

Commercial Kitchen Designer

Qualified Architect with 20+ years' experience in commercial kitchen design and project coordination across the Middle East and Asia.

EQUIPMENT SUPPLY & BRAND SUPPORT

Reliable commercial kitchen equipment for hospitality, food service and production kitchens.

Pacific Kitchens & Catering Equipment supplies commercial kitchen and catering equipment for hotels, resorts, restaurants, cafés, bakeries, commercial kitchens and food production operations across Fiji and the Pacific.

Our equipment range supports cooking, refrigeration, warewashing, food preparation, storage, bakery, beverage and service areas. We work with trusted global brands and supplier networks to provide equipment suited for daily commercial use, tropical conditions and long-term service support.

Capability Areas

- **Cooking Equipment**

Combi ovens, ranges, fryers, grills, cooktops and hot food equipment.

- **Warewashing Equipment**

Dishwashers, glass washers and wash area equipment.

- **Food Preparation Equipment**

Mixers, slicers, processors, prep benches and support equipment.

- **Bakery Equipment**

Ovens, mixers, proofers and bakery production equipment.

- **Refrigeration Equipment**

Chillers, freezers, undercounter units, display units and cold storage support.

- **Catering & Service Equipment**

Trolleys, shelving, storage, buffet and service support equipment.

PRECISION FABRICATORS

Custom stainless steel, sheet metal and fabrication solutions for commercial, hospitality, foodservice and industrial projects.

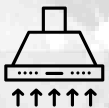

Custom Stainless Steel Fabrication

Benches, sinks, splashbacks, cabinets, shelving and custom stainless steel items.

Commercial Kitchen Fit-Outs

Fabricated solutions for hotels, resorts, restaurants and catering facilities.

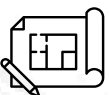

Range Hoods & Exhaust Systems

Custom-built hoods, ducting and extraction support for commercial kitchens.

CNC Cutting & Folding

High-precision cutting and folding for accurate, project-specific fabrication.

Architectural & Industrial Metalwork

Facades, finishes, structural supports, frames and heavy-duty metal components.

Repair & Refurbishment

Restoring, modifying and extending the life of existing fabricated assets.

STAINLESS STEEL & CUSTOM FABRICATION

Built for commercial kitchens, hospitality spaces and industrial use.

Precision Fabricators supports projects with custom stainless steel and metal fabrication for commercial kitchens, hotels, resorts, food production areas, retail facilities and industrial sites.

Our work covers practical fabricated items such as benches, sinks, splashbacks, cabinets, shelving, range hoods, ducting, pipe covers, cladding, frames and custom metal components.

With support from Altitude Group Fiji and Rivet Group New Zealand, Precision Fabricators combines local project understanding with stronger fabrication standards, workshop capability and project delivery support.

Capability Areas

- **Commercial Kitchen Fabrication**

Benches, sinks, splash backs, shelving, cabinets and custom kitchen items.

- **Range Hoods & Exhaust Systems**

Custom stainless steel hoods, ducting and extraction support.

- **Architectural Metal Finishes**

Cladding, facades, decorative finishes and visible metalwork.

- **Industrial Metalwork**

Frames, supports, brackets and heavy-duty fabricated components.

- **Custom Project Fabrication**

Site-specific fabrication based on project drawings, measurements and requirements.

- **Repair & Refurbishment**

Modification, repair and extension of existing fabricated assets.

SPECIALIST EQUIPMENT & WORKSHOP CAPABILITY

Precision tools for accurate fabrication and project delivery.

Precision Fabricators is supported by specialist equipment and fabrication tools that allow the team to produce high-quality stainless steel, sheet metal and custom metalwork for commercial, hospitality and industrial projects.

This capability supports accurate cutting, folding, welding, finishing, polishing and site installation — helping projects move from design through to fabrication and final fit-out.

Our Specializations

- **Custom Stainless Steel Fabrication**
 - Bench tops, sinks, splash backs, cabinets, shelving
- **Commercial Kitchen Fit-Outs**
 - For hotels, resorts, and catering facilities
- **Industrial Metalwork**
 - Structural supports, frames, and heavy-duty components
- **Architectural Metal Finishes**
 - Facades, decorative and functional finishes
- **CNC Cutting & Folding**
 - High-precision manufacturing for complex designs
- **Repair & Refurbishment**
 - Restoring and extending the life of existing assets
- **Range Hoods, Ducting & Exhaust Systems**
 - Custom-built ventilation hoods, stainless ducting, and high-performance extraction fans

Specialist Equipment

- CNC Laser Cutter
- Hydraulic Press Brake
- Hydraulic Guillotine
- TIG & Laser Welding Systems
- Rolling & Pipe-Bending Tools
- Industrial Finishing & Polishing Tools
- Mobile Installation & Fabrication Kits
- CAD & 3D Design Software

PROJECT EXPERIENCE

Proven delivery across hospitality, healthcare, commercial and industrial sectors.

Altitude Group has supported projects across Fiji and the Pacific through its integrated capability in HVAC, refrigeration, commercial kitchen equipment and precision fabrication.

Our project experience includes healthcare facilities, resorts, commercial buildings, food service operations, retail environments, industrial facilities and specialist cold storage applications.

With in-house engineering, service, operations, inventory support, supplier partnerships and fabrication capability, Altitude supports projects from planning and supply through to installation, commissioning and after-sales service.

OUR CORE COMPETENCE

Direct Manufacturer Relationships

Altitude procures capital plant directly from manufacturers, giving us a price advantage over competitors who source from wholesalers.

Extensive Stock Holdings

We maintain significant stocks of capital equipment, making us the largest stockist among commercial refrigeration contractors in Australia and Fiji, ensuring consistent quality and Altitude-branded products.

Customized Solutions

Altitude designs and manufactures refrigeration plant for special applications, incorporating unique protection features to prolong product lifespan in harsh conditions.

In-House Engineering Expertise

Our in-house electrical and mechanical engineering team boasts extensive experience and specializes in design and construction across various applications, ensuring system performance and longevity without reliance on third-party expertise.

Comprehensive Refrigeration Solutions

We offer a complete range of refrigeration products, from standard catalog items to high-tech engineered solutions, catering to diverse customer needs.

Future-Proof Design

Altitude designs refrigeration systems with an eye toward future efficiency, using low refrigerant charge and environmentally friendly refrigerants, providing customers with energy-efficient solutions.

Equal Opportunity Employer

Altitude Group is committed to being an Equal Opportunities Employer, fostering an inclusive environment where all races, religions, and genders are respected and valued. We pride ourselves on a diverse workforce, with women making up approximately 20% of our team—60% of whom hold senior positions. In addition to promoting gender equity, we ensure that all our staff feel appreciated and valued, offering a day off and a \$50 birthday allowance. Our inclusive culture extends to ongoing professional development opportunities, flexible working arrangements, and a supportive work environment that prioritizes employee well-being and career growth.

Altitude Group is a Fiji-registered business operating since 2019 under the Companies Act of Fiji. With our headquarters based at Lot 3, Motorex Complex in Nadi, and a growing presence across the country, we are deeply invested in Fiji — not just in compliance, but in contribution to the Fijian economy.

While some competitors highlight local ownership, we believe what truly matters is local impact.

1. Locally Led

- Our day-to-day operations are run by an experienced team of Fijian professionals, guided by our experienced directors.
- A significant number of our senior leadership positions are held by locally based talent who understand the Fijian market and its needs.

2. Growing Local Employment

- We continue to expand our workforce across all divisions — from refrigeration and HVAC to commercial kitchen projects and service.
- All employees are part of Fiji's PAYE and FNPF system, supporting national economic development.

3. Workforce Development - Investment into training

- Through a structured apprenticeship program in collaboration with the Fiji National University (FNU), we actively train and mentor the next generation of technicians.
- We invest in upskilling with access to tools, certifications, in-house training, and on-the-job experience.

4. Fully Integrated Local Procurement

- We work closely with Fijian suppliers, contractors, and design consultants to ensure projects support the broader economy.
- From daily operations to uniforms and tools, we source locally where possible.
- We are passionate about strengthening Fiji's industries and helping local communities grow.

SERVICE & MAINTENANCE SUPPORT

Support that continues after installation.

Altitude Group supports clients beyond project delivery through service coordination, planned maintenance, breakdown response, troubleshooting, spare parts support and after-sales follow-up.

Our service capability covers HVAC systems, refrigeration equipment, cold rooms, freezer rooms, commercial kitchen equipment, ventilation systems and fabricated project items.

With service teams, coordination staff, technicians, vehicles, warehouse support and supplier access, Altitude helps clients reduce downtime, protect equipment performance and keep operations running reliably.

Service Support Includes

- **Planned Maintenance**

Routine servicing to reduce breakdown risk and extend equipment life.

- **Breakdown Response**

Fault finding, repairs and urgent support for critical systems.

- **Technical Troubleshooting**

Experienced technicians supporting HVAC, refrigeration and kitchen equipment faults.

- **Spare Parts Coordination**

Parts support through local stock, supplier networks and warehouse coordination.

- **After-Sales Follow-Up**

Service records, handover support, client updates and ongoing care.

24/7

Support
Available

Custom

made Preventative
Maintenance Schedule

Reduced Unit Down Time

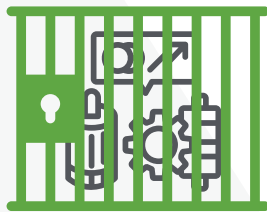

ISLAND & REMOTE SITE SUPPORT

Faster support for island and remote clients.

Altitude Group supports island and remote clients through practical service planning, field coordination, spare parts preparation and dedicated logistics support.

For outer island properties, access to technicians and parts can be a major challenge. To reduce delays, Altitude can support island service works using company boat access where practical, coordinated travel planning and site-based spare parts cages for critical equipment.

This allows technicians to respond with better preparation, reduce repeat travel and access selected spare parts faster when attending planned maintenance or breakdown works.

On-Site Spare Parts Cage

Spare parts cages stocked with commonly used critical parts, ensures repairs are faster, reduce repeat travel and minimise equipment downtime.

Company owned boat access available for island clients

helping us reach out faster to outer island clients where practical.

HEALTH, SAFETY & ENVIRONMENT

Safe work. Responsible delivery. Practical site control.

Altitude Group is committed to delivering work safely, responsibly and in line with client, site and regulatory requirements.

Across HVAC, refrigeration, commercial kitchen equipment and fabrication works, our teams follow practical safety controls to protect staff, clients, subcontractors, equipment and operating environments.

Our approach focuses on planning, PPE, hazard identification, toolbox communication, safe work practices, environmental care and responsible project delivery.

HSE Focus Areas

- **Safe Work Planning**

Job planning, site coordination, risk checks and safe work controls.

- **PPE & Site Readiness**

Hard hats, safety boots, hi-vis, gloves, eye protection and task-specific PPE.

- **Toolbox Communication**

Clear communication before site works, installations and maintenance tasks.

- **Hazard & Risk Control**

Identifying site risks and applying practical controls before work begins.

- **Environmental Responsibility**

Responsible handling of materials, refrigerants, waste and site conditions.

- **Client Site Compliance**

Working with client rules, inductions, permits and site access requirements.

PPE

Site-ready teams

Zero Harm

Safety-first work culture

CONTACT

Let's build, support and maintain your next project.

Altitude Group supports clients across HVAC, refrigeration, commercial kitchen equipment and precision fabrication through one integrated technical group.

For enquiries, quotations, service support or project discussions, please contact our team.
