

Altitude Refrigeration Solutions Pte. Ltd is a progressive, specialist mechanical service and refrigeration contractor with a group head office in Nadi, a regional office in Australia, and a fabrication facility in Suva. We operate throughout Australia, New Zealand, and the South Pacific.

Sheetmetal Ductwork Fabricator

As a Sheet Metal Ductwork Fabricator in the HVAC industry, you will be responsible for fabricating, assembling, and installing sheet metal ductwork systems used in heating, ventilation, and air conditioning (HVAC) systems. Your role involves interpreting blueprints, using various tools and equipment, and ensuring the fabrication of high-quality ductwork components.

Key Responsibilities:

Sheet Metal Fabrication: Precisely cut, bend, shape, and assemble sheet metal to create ductwork components according to design specifications and industry standards.

Reading Blueprints: Interpret and understand technical drawings, blueprints, and schematics to determine project requirements and material specifications.

Operate Machinery and Tools: Utilize a variety of hand and power tools, such as shears, brakes, rollers, and welding equipment, to fabricate and modify sheet metal parts accurately.

Quality Control: Inspect finished products to ensure they meet quality standards, including dimensions, specifications, and tolerances.

Safety Compliance: Adhere strictly to safety protocols and guidelines while operating machinery and handling materials to prevent accidents and ensure a safe working environment.

Collaboration: Coordinate and work closely with the HVAC installation team, contractors, and other relevant stakeholders to ensure timely and accurate installation of fabricated ductwork.

Material Handling: Manage inventory of materials, keep track of supplies, and order necessary materials as required for ongoing projects.

Documentation: Maintain accurate records of work performed, including materials used, time taken, and any modifications made during fabrication.

Qualifications and Skills:

- Proven experience as a Sheet Metal Fabricator or similar role within the HVAC industry.
- Proficient in reading and interpreting technical drawings, blueprints, and schematics.
- Skilled in the use of various hand and power tools related to sheet metal fabrication.
- Knowledge of different types of metals, their properties, and suitable fabrication techniques.
- Strong attention to detail and ability to maintain high-quality standards.
- Ability to work independently or as part of a team in a fast-paced environment.
- Excellent problem-solving skills and adaptability to changing project requirements.
- Certification or vocational training in sheet metal fabrication or a related field is preferred.

Physical Requirements:

- Ability to lift heavy materials and equipment.
- Stamina to work in physically demanding conditions, including standing, bending, and working in confined spaces.
- Note: The responsibilities and qualifications outlined above are intended to provide a general overview of the position. Actual duties and qualifications may vary depending on the specific needs of the projects.
