

## The Next Generation Guided PEMF Therapy

### **What is E+ Therapy?**

Imagine a skilled therapist having a healing energy field come through their hands as they manipulate your body. This unique energy field can stimulate the healing process at a cellular level.

Much like a battery, the human body is electric. Our cells carry voltage. The electric charges necessary to maintain optimum health in our cells can decline from age, injuries and illness. E+ Therapy helps to restore this healthy electrical balance within the body.

According to Dr. Jerry Tennant, MD, author of *Healing is Voltage*, in order for our body's tissues to heal and create new cells, the required cell voltage must be  $-50\text{mV}$ .

PEMF Research: In 1995, Siskin and Walker provided a summary of clinical results on soft tissue damage.

**They observed no adverse from PEMF therapy effects and the following positive effects were reported:**

- Decreased pain
- Reduced inflammation
- Increased range of motion
- Faster functional recovery
- Reduced muscle loss after surgery
- Increased tensile strength in ligaments
- Faster healing of skin wounds
- Enhanced capillary formation
- Acceleration of nerve regeneration
- Decreased tissue necrosis.
