

STRENGTHENING THE BOARD: ENERGY-RESILIENCE VETERAN LARRY G. PAIGE II JOINS AZIO

September 8, 2026

As Azio AI Holdings moves from building its platform to operating it, the company has also been strengthening its board.

Effective September 8, 2026, Azio's Board of Directors appointed Larry G. Paige II as a Class III director, filling an existing vacancy. The Board determined that Mr. Paige qualifies as an independent director under SEC rules and Nasdaq listing rules. He was also appointed to the Audit Committee and the Compensation Committee and named chair of the Nominating and Corporate Governance Committee. The company disclosed the appointment in a Form 8-K filed with the SEC on September 14, 2026.

Mr. Paige's background lines up closely with Azio's business of power-backed compute infrastructure. Since December 2023, he has served in advisory roles as Chief Strategic Officer of Chippewa Sustainable Solutions, Inc. and Executive Director of Energy Resilience Partners, LLC, supporting strategy, federal business development, program governance, energy resilience and microgrids. From 2012 to 2022, he was Managing Director and Chief Executive Officer of United Global Group, Inc.

He began his career in the United States Marine Corps and later served in the United States Navy as Branch Head, Navy Training Requirements. His military and federal service included logistics, acquisition, budgeting, asset accountability, audit readiness and cybersecurity-sensitive systems. He holds degrees from the University of Oklahoma, the Naval Postgraduate School and Boston University.

In its filing, the Board said Mr. Paige brings more than three decades of experience across military logistics, federal contracting, infrastructure, technology, energy resilience and complex program execution. It cited the perspective he provides in financial and operational oversight, AI and data systems, cybersecurity, energy and critical infrastructure, federal and tribal stakeholder engagement, and executive leadership.

For a company whose strategy depends on generating its own power and running mission-critical compute, that mix of energy-resilience and program-execution experience adds depth to the board. The appointment is one more step in Azio's move from a newly merged company to an established public AI infrastructure platform.
