![ROCTEL – Connecting Business]

This is ROCTEL.
The new way to consume advanced Collaboration and Network services.

MANAGED SERVICES | SECURITY | BROADBAND | VOICE

ABOUT ROCTEL

Over 22 Years Designing, Building, Managing, Mid-Market and Enterprise Networks and Services.

With an approach that emphasizes sustainability and planning, you'll find working with us to be collaborative and easy.

Head-quartered and founded in Ireland, ROCTEL is an award-winning MSP established in 2000. Our mission is to provide the best-in-class Cloud, Collaboration, Security, and Broadband Services to businesses.

As a Cisco partner for many years, ROCTEL specialise in providing the Managed Services Infrastructure to suit all your business require-ments and empower your remote work force with best-in-class Work from Home services.

We are focused on building our business in Ireland and the UK, servicing the local and international markets. We have commercial offices in Dublin and London, with our 24/7Data Centre, ROCSOLID NMC and SOC in Dublin.

LATEST ACCOLADES

ESG

Our mission is to sustainably empower your business to easily consume complex technologies as a service, while reducing your risk and cost, accelerating your businesses productivity with proactive management.

Our pledge to offsetting our environmental impact has included a considerable investment in our on-site recycling centre alongside our 2020 tree planting programme with a commitment to plant 10,000 trees in Ireland in the over 5 years.

AS A SERVICE

CYBER DEFENCE
Powered by ROCTEL

ROCSOLID
Powered by ROCTEL

ROCSOLID RETAIL
Powered by ROCTEL

ROCTEL's Cyber Defence system is an aggregation of tools ensuring that individual endpoints in a company's network are secure, whether in-office or at home, anywhere in the world. It embraces SASE — secure access service edge.

We deliver the best connectivity available anywhere using only the best Fibre Networks and Cisco Technologies.

Connectivity, Collaboration, and Security as a Service ... built for RETAIL.

CARRIERS

enet Open Access Networks   NBI   Carrier neutral, access to all tier one carrier networks.

"The difference in service was amazing. There were no delays, no excuses, no messing: just prompt and efficient service. While cost is obviously a major factor in our decision to move to ROCTEL, the level of customer service was also very important. I can pick up the phone and know that I will have their attention immediately. It is rare to get quality and cost in a single package and then to have top class service on top. It's great!"

Enterprise Client, Fortune 500 Company

MANAGED SERVICES

The new way to consume advanced Collaboration, Cloud and Network services.

ROCTEL Managed Services offers clients the best day-to-day management of their Network, Voice, and Data needs, we aggregate complex carrier neutral services, technologies, and platforms as a strategic method for improving operations and cutting expenses, all monitored by our state-of-the-art NMC in our grade A buildings and data centre that offer the best security available.

We deliver the best connectivity available for your home or building, anywhere using only the best Fibre Networks, that meet our highest standards and meet our tier one service promise that we commit to.

"I was totally impressed by everybody's effort and the final solution. I think this reflects very well on your company, again many thanks and appreciation".

SECURITY

Cybercrime has evolved.

ROCTEL Cyber Defence is a mesh that is a flexible, composable architecture that integrates widely distributed and disparate security services.

Cybersecurity mesh enables best-of-breed, stand-alone security solutions to work together to improve overall security while moving control points closer to the assets they're designed to protect. It can quickly and reliably verify identity, context, and policy adherence across cloud and noncloud environments.

"We used to have 2000 staff in two buildings we needed to secure, now we have 2002 locations that we need to secure."

CIO

At ROCTEL we have curated the best in world class vendors to help us develop CYBERDEFENCE to protect your business. Our vendor partners include but are not limited to Cisco, Microsoft, Dark Trace and Palo Alto.

These amazing companies allow ROCTEL's CYBERDEFENCE team build a ring of steel around you and your business wherever it may be.
