ABOUT ROCTEL

Over 25 Years of Designing, Building and Managing Business-Critical Mid-Market and Enterprise Networks and Service

Founded in Ireland in 2000, ROCTEL is an award-winning Cisco-Powered Managed Service Provider (MSP) with a 25+ year track record delivering secure, scalable, and intelligent network solutions to mid-market and enterprise organisations. Our mission is simple: to help businesses securely consume complex technologies as a service across cloud, collaboration, cybersecurity, and connectivity — with proactive support, reduced risk, and measurable efficiency.

Headquartered in Dublin, with a presence in the UK, Spain, and beyond, we support national and international clients through tailored solutions and trusted expertise — delivered via our 24/7 Network Operations Centre (NOC), dedicated Security Operations Centre (SOC), and fully managed services powered by our ROCSOLID platforms.

Whether you're enabling hybrid workforces, modernising your digital infrastructure, or navigating compliance demands — ROCTEL is your partner in powering smarter, safer business.

LATEST ACCOLADES

ESG

Our mission is to sustainably empower your business to consume complex technologies as a service with ease, reduced risk, and lower costs.

Through proactive management and secure digital infrastructure, we help accelerate your productivity while maintaining a strong commitment to sustainability. To date, we've planted over 10,000 trees as part of our carbon offsetting initiatives, supporting global reforestation and climate action efforts. We've also invested in our own on-site recycling centre, enabling the responsible disposal of electronic equipment and packaging waste, and reducing our environmental footprint across all operations.

MANAGED SERVICES

ROCTEL Managed Services delivers secure, high-performance connectivity with full end-to-end management of your network, data and voice infrastructure.

Built on Cisco-Powered technologies, our solutions offer best-in-class performance, security, and scalability. We simplify complex technologies to keep your operations seamless, helping your business cut costs, boost efficiency, and stay agile in a digital-first world.

All services are monitored 24/7 from our state-of-the-art Network Management Centre (NMC) and backed by enterprise-grade data centres with top-tier security and resilience.

As a carrier-neutral provider, we deliver the best-fit connectivity for every site using Ireland's top fibre networks — meeting strict SLAs and our commitment to tier-one service excellence.

AS A SERVICE

A comprehensive, Cisco-Powered connectivity solution that delivers secure, intelligent, and proactively managed network performance ensuring your business stays online, informed, and ready for anything.

Enterprise Connectivity: Fully managed, high-speed fibre for large offices and multi-site environments.

ROCSOLID Broadband: An all-in-one managed broadband solution with cloud visibility and built-in security.

Fibre DIA: Dedicated internet access with guaranteed speeds — scalable up to 100Gbps.

Microwave Wireless: High-performance connectivity where fibre isn't available, with licensed microwave links.

HyperCloud SD-WAN: AI-powered, multi-site cloud networking — ideal for businesses with global or distributed operations.

A fully managed network solution designed specifically for the retail sector — offering secure, high-performance connectivity, real-time analytics, and 24/7 monitoring to keep stores online, protect customer data, and power smart, seamless shopping experiences.

A purpose-built managed connectivity and cybersecurity solution for healthcare delivering secure cloud infrastructure, 99.999% uptime, and real-time insights to keep critical services running and patient data protected.

ROCTEL delivers Webex by Cisco best-in-class, smart voice and collaboration solutions powered by Cisco designed to keep hybrid and multi-location teams connected delivering secure, scalable cloud-based calling and seamless communication

Global, secure, and AI-first software-defined networking for enterprises managing multiple locations. HyperCloud SDWAN enables businesses to seamlessly connect offices, remote workers, and data centers with Intelligent Routing, Zero-Trust Security Architecture and Automated Threat Detection.

CONNECT TO OVER 300 CLOUDS

“Now that we’ve set our sights on the world, it’s good to know Cisco technology, underpinned by ROCTEL’s Managed Service, offers an IT roadmap that is as ambitious as ours. The future is bright.”

VP at InnaLabs

“ROCTEL delivers prompt, efficient service with no delays or excuses. Their customer care is exceptional — we’re treated like a priority, not a number. Great value, great quality, and top-class support.”

Swissport

“We have total peace of mind now. Whether it’s a storm or any other issue, we know we don’t have to worry — it’s business as usual.

Once the ROCTEL engineer came in and installed what was needed, we were up and running, and we haven’t looked back since.”

SECURITY

ROCTEL simplifies cybersecurity with a fully managed solution that keeps your business: Connected • Protected • Defended

THE THREAT LANDSCAPE

Cyber threats are rising — with over **80% of organisations** experiencing incidents annually. From phishing and **ransomware** to **business email compromise**, the risks are real.

And with regulations like **NIS2**, **DORA**, and **GDPR**, compliance is no longer optional.

CYBER DEFENCE: COMPLETE PROTECTION, BUILT-IN

ROCTEL simplifies cybersecurity with a fully managed solution that keep your business:

- Connected
- Protected
- Defended

Our security is **built-in**, not bolted on — delivering:

- DNS-layer protection to block threats before they reach your network
- Cloud-based security for seamless coverage across all locations
- AI-powered threat intelligence to detect and stop attacks early
- Integration with existing systems and SIEM platforms for unified defence

Whether you're a growing SME or a large enterprise, ROCTEL makes deployment fast, efficient, and scalable:

- No hardware required — cloud provisioning
- Full network coverage — on-site, remote, and IoT
- Integrated policies — with Cisco AnyConnect, ISR routers, and Meraki
- Security assessments — to identify and fix vulnerabilities

VENDORS

POWERED BY CISCO & MERAKI

As a Cisco-Powered Premier Partner, ROCTEL delivers trusted infrastructure with local expertise.

Our solutions include:

- Enterprise-grade firewalls
- Smart Wi-Fi and centralised dashboards
- Proactive threat detection and response

From one site to 100, we help you scale securely, monitor effortlessly, and stay connected with confidence.

WHY ROCTEL CYBERDEFENCE?

- Zero Trust architecture
- Real-time threat detection
- End-to-end compliance support
- 24/7 monitoring
