At Grail x studio, we craft architectural designs that inspire and elevate from building construction and project design to interior design, 3D elevations, with top-notch structural, electrical, and mechanical drawings, as well as stunning rendered plans and conceptual designs. Our expertise extends to 3D animations, realistic models, commercials and exquisite 2D pencil artworks.

Who We Are

Company History

We started our company with 2D pencil art work, with a vision of expanding to a dream that later became a reality. Our Architectural Design idea was made a reality in the year 2020. Single handed we grew the company based on the principles of honesty, integrity, and service.

After establishing trust with customers and having extra workload and building a good reputation, a group of skilled individuals was brought on board, playing a vital role in the company's progress and achievements.

After getting recognized by a lot of individuals and customers and reaching the target we wanted we decided to expand to not just Architectural designs but Animations, 3D models and asset. We then proceeded to animating and creating product advertisements for companies, and so far we've been explicit.

We have a vision of expanding our company globally, and with hard work and commitment we look forward to making it a reality.

A high-angle photograph of a woman with dark hair, wearing a white, short-sleeved, knee-length dress and white high-heeled sandals. She is lying on her side on a wooden staircase with a dark metal handrail. The staircase is made of light-colored wood and is set against a white wall. The lighting is soft and even, highlighting the texture of the wood and the fabric of the dress.
