

# THE PARTNERSHIP OF ELITE ENERGY AND ENERGYSYS

THE PARTNERSHIP OF

# ELITE ENERGY AND ENERGYSYS

[www.elite-energy.co](http://www.elite-energy.co)

# Introduction

Welcome to the new standard in production allocation and operational efficiency in the Oil & Gas sector. Elite Energy, in partnership with EnergySys, are reshaping the landscape with cloud solutions tailored for production allocation workflows. Infused with our core values of Adaptability, Responsiveness, and Customer Focus, our solutions are more than just products; they are enablers of your success.

# The Elite Energy Consultants and EnergySys Partnership

## A Union of Expertise and Innovation

Since 2008, Elite Energy has been a beacon of innovation in the energy sector with a focus on operational and production excellence. Our partnership with EnergySys, established in 2015, underlines our commitment to excellence in cloud-based SaaS solutions and support services. As the only Platinum Value-Added Reseller, we are dedicated to configuring the EnergySys platform to perfectly meet your operational needs. With over 30 asset implementations of the platform, we are the largest and most experienced implementor of EnergySys.

## Benefits of Our Partnership

### Expert Configuration:

We specialise in the configuration of The EnergySys platform to your specific business requirements, avoiding the tradition of expensive customisation and focusing on efficient, agile solutions.

### Turnkey Support for Level 2 and Level 3:

We provide comprehensive turnkey support for Level 2 configuration and Level 3 platform support, ensuring a seamless, efficient, and agile operation of the EnergySys platform within your business environment.

### Reliable SLA Commitment:

Our services are backed by a robust Service Level Agreement, guaranteeing consistent quality and reliability in our support and solutions, giving you peace of mind in your operational continuity.

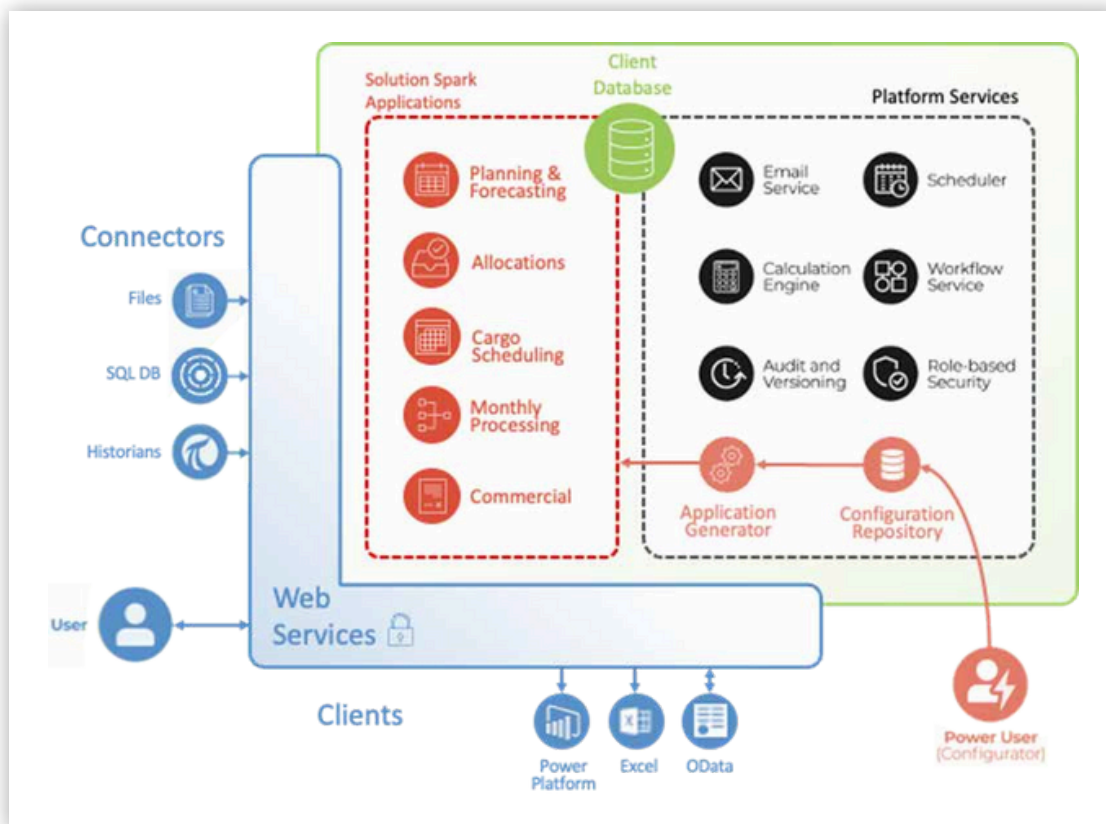

# EnergySys Cloud Platform: Architecture and Features

## Powered by AWS

TheEnergySys platform, built on AWS cloud architecture, guarantees global reach, top-tier security, and unmatched performance.

## Platform Feature:

**User-Centric Design:** Intuitive and scalable, the platform meets the needs of both single-asset operations, complex multi-product and dynamic commercial operations.

**Integration Capabilities:** Enhance operational visibility and decision-making with our powerful API and seamless integrations.

**Enhanced Operational Efficiency and Economic Advantage:** Experience a significant decrease in total cost of ownership — our clients report up to a 70% reduction, ensuring a leaner financial footprint while boosting operational performance.

# Data Security, Residency, and Compliance

## Global Compliance and Local Solutions

For jurisdictions without AWS Regions, we offer solutions that comply with local legislation, including data storage in a regionally friendly AWS location and optional replication to an onsite datastore.

## ISO 9001 and ISO 27001 and SOC 2 Audit

### **ISO 2001 and SOX Compliance:**

Our platform adheres to the highest standards of data security and privacy.

### **Advanced Security Measures:**

We employ rigorous encryption and access controls to safeguard your data.

# Applications Built on EnergySys by Elite Energy

## Tailored Applications for Industry Challenges

Our suite of applications on the EnergySys platform addresses diverse needs in production allocation, data management, and operational efficiency, ensuring tools for informed decision-making.

### Upstream

- Reserves Management
- Field Data Capture
- Nominations and Scheduling
- Production Allocation & Commercial Allocation
- Inventory Control

### Midstream

- Gas Transportation Management & Pipeline Allocations
- Trucking
- Carbon Capture and Storage
- Tanker Vetting
- LNG Trucking
- LNG Annual Delivery Programming
- LNG Offtake Management and Cargo Documentation
- Laboratory Information Data Store
- Shipper Statements & Billing

### Downstream

- Crude Oil Sales
- Tanker Vetting
- Offtake Planning
- Crude Offtake Management & Cargo Documentation
- Statements & Billing

### Common

- Production Management Framework\* (Forecasting, Loss Management, Allocation and Opportunity Management)
- Measurement Management System
- Laboratory Information Data Store
- Emissions Tracking and Reporting (GHG)
