

# 20th WHSI INNOVATION SUMMIT 2026

Presented by

Advancing Science, Dialogue, Innovation in Wound Healing

Barcelona, Spain | 7-9 October 2026

## About the Summit

The Wound Healing Science & Industry (WHSI) Innovation Summit is the premier annual gathering advancing the science and practice of wound healing and limb preservation. Now in its 20th year, the Summit convenes a curated global community of academic researchers, clinicians, innovators, policymakers, and industry leaders for two days of immersive exchange.

WHSI prioritizes depth over scale — creating space for open and focused dialogue, critical thinking, and cross-disciplinary exchange to accelerate the discovery and application of breakthrough solutions. Through interactive sessions, translational science, and strategic networking, participants engage across the full continuum of innovation: from bench to bedside to policy.

WHSI champions scientific excellence, early-stage innovation, and impactful collaboration. It is an innovation-forward, science-driven summit where translation and impact are at the center of every session.

Note: WHSI is not a CME-focused meeting.

## Who Attends

Researchers, clinicians, innovators, policymakers, and industry leaders shaping the future of wound healing and limb preservation.

## Key Themes

- Regenerative Medicine & Tissue Repair
- Vascular & Diabetic Complications
- Digital Health & AI Integration
- Early-Stage Innovation & Startups
- Policy, Reimbursement & Market Access

## Why Attend

- Strategic, cross-disciplinary networking
- Emerging research & translational science
- Innovation spotlights & early-stage technologies
- Expert-led panels & interactive, science-driven sessions
- Actionable insights that accelerate discovery and impact

## Partnership & Scientific Collaboration

WHSI welcomes strategic engagement from innovation-focused companies, translational science teams, and academic-industry collaborators.
