

Backup for Office 365 Exchange and OneDrive

A feature available with SolarWinds Backup

Backup for Office 365[®] is designed to protect Microsoft[®] Office 365 users from data loss. Backup for Office 365 helps retain and restore Exchange[™] and OneDrive[®] data critical business documents

PROTECT OFFICE 365 FROM THE SAME DASHBOARD AS SERVERS AND WORKSTATIONS

- ✓ Save administrative time every day by checking status and managing backups in one place.
- ✓ Improve backup management efficiency with at-a-glance status views and one-click drilldown reports.
- ✓ Show backup status across customers and device and data types with a clean, web-based console.

ARCHIVE AND RETAIN CUSTOMER DATA

- ✓ Help customers meet retention and regulatory requirements with data storage in your choice of more than 30 worldwide data centers.
- ✓ Retain and recover Office 365 Exchange data for up to seven years.
- ✓ Retain and recover Office 365 OneDrive data for up to six months.

RECOVER AS NEEDED, INDEPENDENT OF MICROSOFT SUPPORT

- ✓ Equip yourself to respond to customer requests without reliance upon Microsoft support responsiveness.
- ✓ Back up Office 365 Exchange every four hours.
- ✓ Back up Office 365 OneDrive every six hours.

EXTEND AND MODERNIZE YOUR DATA PROTECTION SERVICES OFFERING

- ✓ Keep your data protection services up to date as your customers adopt Office 365.
- ✓ Continue to add value as your customers' SaaS application usage evolves.
- ✓ Don't lose customers to competitors that offer broader data protection services.

Please note that Backup for Office 365 is currently available for clients enrolled in our complete Disaster and Recovery services.
