

**Healing Hearts Home Health Presents
New Programs:
OUTPATIENT PT AND OT**

Home Outpatient PT

- Same therapist promoting continuum of care
- Optimize and refine function
- Geared toward functioning safely **at home**
- Safely provide in home therapy to prevent potential exposure to viruses or illnesses
- Activities of Daily living retraining
- Home Exercise and balance program
- Caregiver training
- Home/Environment modifications and accessibility solutions
- Home Safety evaluations and falls/injury prevention

VS

Traditional Outpatient PT

- A course of treatment to support your recovery and rehabilitation, delivered through a series of visits to a private therapy practice or a clinic
- Therapy tends to focus on helping patients restore function following an injury or surgery, so they can get back to their normal activities.
- Able to make braces
- Outpatient Therapy Services require a patient to drive to treatment
- Has equipment available to assist with strengthening and recovery

Easy referral process:

When a patient transitions from traditional home health to Outpatient home health there are no:

- **No face to face requirements**
- **Patient does not need to be homebound**

Requirements are:

- **Physician order required**
- **Signed Evaluation**

Target Patients

Healing Hearts Home Health hopes this new service line will assist patients who are unable to attend outpatient services and are falling through the cracks. We would like to give physicians another option of care for patients that are immunocompromised, high risk for falls, and unable to get to and from outpatient therapy clinics for certain reasons. We continue to recommend outpatient therapy to appropriate patients and would like to utilize this program for the outlier patients who don't have the option or accessibility of going to an outpatient clinic.

Our therapist are excited to work with all physicians on this process please call with any questions or referrals.
