

Thank you for your interest in joining the Higher Conscious Network. We are a mission-driven organization dedicated to empowering marginalized communities through holistic conscious development. We believe in the power of collaboration and multidisciplinary guidance to create sustainable social change.

**How our model works:**

As a provider, you will be placed in a collaborative group with other experts from diverse fields, such as holistic health, faith-based leadership, and clinical wellness. Together, you will serve a dedicated group of users, curating content, guiding courses, and hosting sessions to facilitate their unique conscious journey.

**Our standards for providers:**

All applicants must read, understand, and agree to the following standards, which form the basis of our ethical and spiritual commitment to our users and community.

- Spiritual and ethical standards:
  - Do no harm: Your primary responsibility is to protect the well-being of every user.
  - Scope of practice: You must only offer guidance within your certified or experienced area of expertise. We are a non-therapeutic platform, and all providers must respect that boundary.
  - Cultural humility: Approach all cultural and ancestral traditions with deep respect and avoid appropriation.
  - Non-prescriptive guidance: Your role is to empower, not dictate. You will always respect the autonomy of the user.
  - Confidentiality: Strict confidentiality of all user information is mandatory and legally enforced.
- Technical and compliance standards:
  - Platform proficiency: You must be comfortable using our platform's collaboration tools, content creation features, and live session hosting.
  - Privacy laws: All providers must agree to adhere to international data privacy regulations, such as GDPR.

- Accessibility: Content and sessions must be accessible to users with disabilities (e.g., using captions for videos).
- The provider screening process:
  - Application and credential verification: All applicants must submit their credentials for review.
  - Code of conduct agreement: You will be required to digitally sign an agreement confirming your commitment to our spiritual, ethical, and technical standards.
  - Onboarding and training: Successful applicants will receive training on our collaborative model, non-therapeutic guidelines, and cultural competency.
